Period for Reply

### A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because it is a run-on type sentence. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. For example, the phrase "characterized by comprising" (lines 1-2) is redundant; the phrase "as of the end" (line 8) is unclear; and the term "its" should not be used due to the equivocal nature of the term.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Woerthwein et al. (EP 1 186 714 A2). Wörthwein et al. discloses a guardrail terminal having vertical supporting members (4a-4g) with a horizontal retaining member (1a) fixed thereto. There is a horizontal curled section (1) projecting from the terminal end of the retaining member in the manner claimed (Figure 1, for example).
6. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Denman et al. (U.S. Patent 6,142,452). Denman et al. discloses a guardrail terminal having vertical supporting members (20, 22) with a horizontal retaining member (Figure 1) fixed thereto. There is a curled section (24) projecting from the terminal end of the retaining member in the manner claimed (Figure 1).
7. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ivey (U.S. Patent 5,791,812). Ivey discloses a guardrail terminal having vertical supporting members (17) with a horizontal retaining member (Figure 1, for example) fixed thereto. There is a curled section (14) projecting from the terminal end of the retaining member in the manner claimed (Figure 1, for example).

### ***Claim Rejections - 35 USC § 103***

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over any of Wörthwein et al., Denman et al. or Ivey as applied above, and further in view of Gertz (U.S. Patent 6,024,341). Wörthwein et al., Denman et al. and Ivey do not teach the corrugated construction; however, it is well known that the corrugated structure increases structural rigidity. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a corrugated construction with any of Wörthwein et al., Denman et al. or Ivey in order to obtain a structure more rigid for a particular application, in accordance with the teaching of Gertz.

***Allowable Subject Matter***

10. Claims 5-8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

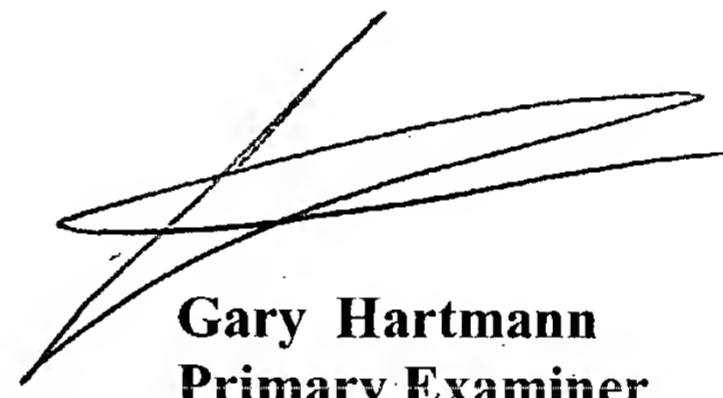

***Conclusion***

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Friday, 9am-6pm.
